2. This communication is responsive to the claims filed 04/09/2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
 - (e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
3. Claims 1-2, 9, 12-14, 20, 23-26 and 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Fretz (U. S. Pat. App. – 2005/0047620).

Regarding claims 1-2, 14 and 25, Fretz discloses a hearing aid comprising: a microphone (206) to receive audio inputs and provide a response signal (208); a signal processor to process the response signal (236) to generate a transducer drive signal (210), wherein a portion of one of the response signal and the transducer drive signal is received over a feedback path (202) as a feedback signal; a transducer (210) to utilize the transducer drive signal to stimulate a component of the auditory system; phase shifter logic (248) to shift the phase of the feedback signal in a predetermined amount(240), without modification of signal gain characteristics, to achieve a non-zero net phase of the feedback signal over the feedback path as claimed.

Regarding claims 9, 20, 26, Fretz further discloses the hearing aid, comprising: adaptive circuitry (244) to determine the phase of the feedback signal over the feedback path.

Regarding claims 12-13, 23-24 and 33, Fretz further discloses the hearing aid, wherein the phase shifter logic (248) is configured to shift the phase based on the patient's ability to detect audio queues generated by the phase shift to minimize the patient's detection of the phase shift (Fig. 2) as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-11, 21-22 and 34-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fretz (U. S. Pat. App. – 2005/0047620).

Regarding claims 10-11, 21-22 and 34-35, Fretz may not specially teach the phase shifting range as claimed. Since Fretz does not specially restrict the phase shifting range and providing a suitable range for the hearing aid to reduce noises is very well known in the art, it therefore would have been obvious to one having ordinary skill in the art at the time the invention was made to be motivated to provide a phase shifter with desirable shifting range, such as 200 degree for the hearing aid as an alternate choice, in order to provide a hearing aid with desirable noise cancellation capability for specific individual and/or under specific circumstances.

Allowable Subject Matter

5. Claims 3-8, 15-19 and 27-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Suhan Ni** whose telephone number is (571)-272-7505, and the number for fax machine is (571)-273-7505.
